

Are you caring for a loved one with Dementia?

FREE Educational Workshop on Dementia Care

It is difficult to watch how dementia affects a loved one. While no one knows your loved one better than you, most family caregivers are never taught how to make dementia care easier and more effective.

At Your Side Home Care wants to provide you with dementia care strategies known to create better days and alleviate some of the stress you may be experiencing. Join us for a free workshop that will help you:

- Learn that dementia is not just about memory loss
- Understand how to prevent difficult Dementia behavior before it begins
- Utilize three go-to methods you must know for Dementia caregiving
- Identify risks family caregivers may experience and ways to reduce them

The information presented is from At Your Side's Dementia Care Program: DementiaWise. This program helps clients with dementia optimize their abilities and enhances their quality of life. Attending will teach you DementiaWise tools while providing new insight on dementia care.

KEYNOTE SPEAKER

Deborah Bier, PhD, Director of Special Populations for ComForCare Health Care Holdings, Inc., has a doctorate in therapeutic counseling and is certified by the Alzheimer's Association and Commonwealth of Massachusetts to coach family caregivers in dementia care best practices. Dr. Bier will present this informative workshop designed specifically for family caregivers who are caring for a loved one with dementia.
